

To Whom It May Concern:

I was one of many that get up at 4:30 AM and go to work and come home at night and look forward of peace & quiet. Prior to the No Call Law, my family's telephone rang over 30 times a week. I have daughters that live out of state so when the telephone rang, I answered it and of course the person on the other line will not take "no" for an answer. The peace & quiet since the Law has increased my peace of mind. The constant calls also interrupt my life activities long into the night. getting woke up at 9-10 PM at night hindered my quality of work and quality of life. The Indiana's No Call Law has been great for my family and myself. The FCC Law would take us back another 2 years and I am strongly against that. Go find another Law to change for we in Indiana like our Law.
